

IMPORTANT NOTICE

RESTRICTION ON USE OF FIXED HOSES & SPRINKLERS

Council is seeking cooperation of residents in the three urban areas to restrict the use of fixed hoses and sprinklers during the day. This action is being requested due to problems being experienced in keeping reservoirs at a sufficient level – pumps currently are unable to cope in refilling reservoirs.

Council seeks residents' support in not using fixed hoses and sprinklers between the hours of **8.00 a.m. and 6.00 p.m. daily**. We are experiencing hot weather conditions with the forecast of further high temperatures and compliance with Council's request will allow adequate water storage to be maintained.

Conserving water usage as suggested will prevent Council having to impose water restrictions. Council thanks residents for their cooperation.
