

CONSTRUCTION CERTIFICATE APPLICATION

Coonamble Shire Council

P.O. Box 249, COONAMBLE NSW 2829

Telephone: (02) 6827 1900 Facsimile: (02) 6822 1626

Development Application No.: _____

Assessment No.: _____

If you want to carry out some building work or subdivision work (such as building roads or a stormwater drainage system), you need a construction certificate before you can start work. You can use this form to apply for a construction certificate. To complete the form, please place a cross in the boxes and fill out the white sections as appropriate. To minimise delay in receiving a decision about your application, please ensure you submit all relevant information. You need to apply to a certifying authority (either your council or a private certifier).

1. DETAILS OF THE APPLICANT

Mr. Ms. Mrs. Dr. Other

First name

Family name

Postal Address

Suburb or town

State

Postcode

Daytime telephone

Fax

Mobile

E-mail

2. IDENTIFY THE LAND

Flat/street no.

Street name

Suburb or town

Postcode

Lot

Section

DP

You can find the lot, section and DP No. on a map of the land or on the title documents for the land. If you need additional room, please attach a schedule and/or a map with these details.

3. ESTIMATED COST OF THE DEVELOPMENT

\$

Including the reasonable market cost of labour and materials plus GST

4. DESCRIBE THE DEVELOPMENT

What type of work do you propose to carry out?

Building work

Subdivision work

Describe the work

□

5. BUILDER DETAILS

Are you using a licensed builder?

- No
 Yes

Builder's name

Builder's address

Builder's licence number

Contact phone number 1

Contact phone number 2

If you are using a licensed builder for residential building work exceeding \$12,000 you must obtain Home Building Act Insurance. A certificate of insurance must be provided with this application or submitted with the Notification of Commencement form.

Have you attached to this application evidence that the licensed person is insured to carry out this type of work?

- Yes
 No – to be provided with notification of commencement form
 Not applicable – development is not residential, or residential related.

Are you an owner builder?

- No
 Not applicable – development is not residential, or residential related.
 Yes

Copy of Owner Builders Permit attached?

- No – to be provided with notification of commencement form
 Yes

Owner builders permit number

Note 1: An owner builders permit is required for all residential building work more than \$5,000 in value where a licensed person is not contracted to do the work.

Note 2: Any tradesperson who is employed for works greater than \$1,000 must be appropriately licensed.

6. LONG SERVICE LEVY

Is Long Service Levy applicable? (0.35% of estimated value > \$25,000) Yes No

7. APPLICANT'S SIGNATURE

Clause 139 of the Environmental Planning and Assessment Regulation 2000 provides that Construction Certificate applications can be made by "the person having the benefit of the development consent". This is normally the land owner or the original applicant for development consent

Applicant's signature

Date

8. PRIVACY POLICY

The information you provide in this application will enable your application to be assessed by the certifying authority. If the information is not provided, your application may not be accepted. Please contact the council if the information you have provided in your application is incorrect or changes.

9. INFORMATION TO BE ATTACHED TO THE APPLICATION

You need to provide material with your application that is relevant to the type of work you propose to do. Please indicate the material you have attached by placing a cross in the appropriate boxes :

1. If you are going to carry out **building work**:

- a copy of any compliance certificates on which you rely
- detailed plans of the building (3 copies) that are sufficient to demonstrate that the proposed design complies with the Building Code of Australia.

The plans must be drawn to a suitable scale and consist of a general plan and a block plan. The general plan of the building is to:

- show a plan of each floor section
- show each elevation of the building
- show the level of the lowest floor, the level of any yard or unbuilt area on that floor and the level of the ground
- indicate the fire safety and fire resistance measures (if any), and their height, design and construction

Where you propose to alter, add to or rebuild a building that is already on the land, or modify plans that have already been approved, please mark the general plan (by colour or otherwise) to show the change you propose to make.

- detailed specifications of the building (3 copies)

The specifications are to:

- describe the construction (including the standards that will be met), the materials which will be used to construct the building and the methods of drainage, sewerage and water supply
- state whether the materials proposed to be used are new or second hand and give details of any second-hand materials to be used.

Where you propose to modify specifications that have already been approved, please mark the approved specifications (by colour or otherwise) to show the modification.

- a plan of the existing building, drawn to scale, where the application involves building work to alter, enlarge or extend that building

This plan will assist the certifying authority to assess whether the work will reduce the fire protection capacity of the building.

- where you propose to meet the performance requirements of the Building Code of Australia (BCA) by using an alternative solution to the deemed-to-satisfy provisions of the BCA:
 - a list of the performance requirements you will meet by using the alternative solution
 - the details of the assessment methods you will use to meet those performance requirements
 - a copy of any compliance certificates on which you rely

- evidence of any accredited component, process or design on which you seek to rely

Components, processes or designs that relate to the erection or demolition of a building are accredited under the Environmental Planning and Assessment Regulation 2000.

- details of the fire safety measures, unless you are building a single dwelling or a non-habitable building or structure (such as a private garage, carport, shed, fence, antenna, wall or swimming pool). These details are to include:

- a list of any fire safety measures you propose to include in the building or on the land
- if you propose to alter, add to or rebuild a building that is already on the land, a list of the fire safety measures that are currently used in the building or on the land

The lists must describe the extent, capability and the basis of design of each measure.

- the attached schedule, completed for the development

The information in the schedule will be used by the Australian Bureau of Statistics to report each quarter on the building activity that occurs in the economy. Building statistics allow governments and businesses to accurately identify main areas of population growth and demand for products and services.

9. continued

- a long service levy to construct a building, unless:
- a long service levy has already been paid for the building
 - the cost of construction is less than \$25,000
 - the building will be constructed for a public authority and those who will do the work are employed by that public authority
 - the building will be constructed by or for a church or non-profit organisation and will be built wholly or partly by volunteers, or
 - the building will be constructed by an owner-builder.
2. If you are going to **carry out work to do a subdivision** (eg building roads or a stormwater drainage system):
- the details of the existing and proposed subdivision pattern (including the number of lots and the location of roads)
- the details of the consultation you have carried out with the public authorities who provide or will increase the services you will need (like water, road, electricity, sewerage)
- the existing ground levels and the proposed ground levels when the subdivision is completed
- copies of any compliance certificates on which you rely
- detailed engineering plans (3 copies). The detailed plans might include the following:
- earthworks
 - roadworks
 - road pavement
 - road furnishings
 - stormwater drainage
 - water supply works
 - sewerage works
 - landscaping works
 - erosion control works

Where you propose to modify plans that have already been approved, please mark the approved plans (by colour or otherwise) to show the modification.

3. If you are going to **change the use of a building** or the classification of a building under the Building Code of Australia and you are doing building work (unless the building will now be used as a single dwelling or a non-habitable building or structure (such as a private garage, carport, shed, fence, antenna, wall or swimming pool)):
- a list of any fire safety measures you propose to include in the building or on the land
- if you propose to alter, add to or rebuild a building that is already on the land, a list of the fire safety measures that are currently used in the building or on the land
- details as to how the building will comply with the Category One fire safety provisions of the Building Code of Australia

The lists of fire safety measures must describe the extent, capability and the basis of design of each measure.

Schedule to application for a construction certificate

Please complete this schedule. The information will be sent to the Australian Bureau of Statistics.

All new buildings

Please complete the following:

- Number of storeys (including underground floors)
- Gross floor area of new building (m²)
- Gross site area (m²)

Residential buildings only

Please complete the following details on residential structures:

- Number of dwellings to be constructed
- Number of pre-existing dwellings on site
- Number of dwellings to be demolished
- Will the new dwelling(s) be attached to other new buildings? Yes No
- Will the new building(s) be attached to existing buildings? Yes No
- Does the site contain a dual occupancy?
(NB dual occupancy = two dwellings on the same site) Yes No

Materials – residential buildings

Please indicate the materials to be used in the construction of the new building(s):
