

## **NO RESTRICTIONS ON WATER USE**

Council is now able to lift its restricted use of water immediately. This means residents can use their water supply at any time – day or night.

Issues that forced Council to impose water restrictions have been addressed. The recent rain and cooler weather are also working in Council's favour in managing its water supplies.

Council thanks residents for their co-operation when restrictions were in place – staff appreciate your efforts. Water restrictions are imposed only as a last resort and residents' compliance certainly assists during those times.
