The Shires Association and the Local Government Association held a convention in August 2010 to discuss the issue of forming One Association to represent Local Government in NSW. The deliberations of the convention resulted in the agreement of 27 foundation principles, however in itself the convention is unable to bind either Association. A binding decision can only be achieved by a Conference. The convention principles were presented to the Local Government Association Conference in late October for discussion after which it was resolved:

“That this Conference, having considered the principles recommended by the One Association Convention, direct the Executive to take these principles into account when progressing the One Association.”

The one day conference will be the Shires Association members' opportunity to consider the outcomes of the convention and provide direction to the Executive so that this matter can be progressed to the next stage. If time permits, other matters of importance to member councils will be discussed, including an update on the issue of modernising Local Government and an update on industrial matters, including the new award. A survey form outlining each of the convention decisions and asking if council agrees, disagrees or believes that further discussion is warranted, is attached to the correspondence and is not binding but will help to determine the course of the agenda. One voting delegate will be afforded to each member council, but Council may send as many observers as they wish.

10.17 AUSTRALIAN LOCAL GOVERNMENT ASSOC. R8-8 (33852)

The Association has commissioned a Report into local road funding to shed some light on the continuing challenges facing councils throughout Australia in

maintaining the local road network (80% of all roads in Australia). The findings of the Report were released at ALGA's 2010 Nation Local Roads and Transport Congress held in October. The Report notes the progress by councils in improving the management of local road assets through the adoption of improved asset management frameworks supported by the Australian Government's Local Government Reform Fund and the significant contribution that the Road to Recovery Programme has made to improving local roads. However it also finds that much more needs to be done to address the provision and maintenance of local roads across Australia. It reveals local government as a whole faces a shortfall in local road funding between 2010 and 2025 of around \$1.2 billion per annum. This is the extra amount required by councils, above planned expenditure including existing grants, to simply maintain the current level of service for local roads. The current Roads to Recovery Programme lapses in June 2014 and the findings of the Local Roads Funding Gap Report underlines the critical nature of that programme. ALGA will be using the Report to lobby all federal parliamentarians during the term of this Parliament to secure adequate road funding for local communities across Australia. ALGA requests Council consider raising this report with local Federal Members of Parliament to support local government in its aim of ensuring that local roads are adequately funded.

Introducing an initiative to boost the supply of affordable housing, the State Environmental Planning Policy (Affordable Rental Housing), 2009 (ARH SEPP) helping to address the housing affordability challenges in NSW. Part 3 of the ARH SEPP is concerned with retaining existing affordable housing and mitigating its loss when redevelopments occur. The SEPP does so by incorporating the provisions of the former State Environmental Planning Policy 10 (Retention of Low Cost Rental Accommodation). Previously funds raised were retained by local councils for their own housing initiatives. However, in many cases low levels of local contributions meant local councils had insufficient funding to support local housing projects and most of these funds remained unspent. The Minister for Planning has issued a direction requiring that local governments transfer the contributions raised under the ARH SEPP of contributions which are still due for development applications submitted under SEPP 10 to Housing NSW including any contributions which are still due in terms of development applications submitted under SEPP 10 but not yet determined. The pooled contributions are to be used in Housing NSW's Boarding House Financial Assistance Programme which has been expanded to provide incentives details of which are published on this web site <http://www.housing.nsw.gov.au/Centre+For+Affordable+Housing> In addition there is now opportunity for local councils to work together with Housing NSW through the National Rental Affordability Scheme to leverage any SEPP 10 funds that they may have collected previously.

10.43 LOCAL GOVERNMENT AND SHIRES ASSOC. S7 (34154)

The LGSA are concerned about escalating NSW Emergency Services budgets of which Local Government contributes 11.7% through the Emergency Services Levy (ESL). Emergency Management NSW sent councils the 3rd quarter ESL invoice; this invoice included the adjustments for the finalised Rural Fire Service (RFS) budget. The state component of the RFS budget, i.e. the RFS Fire Fighting Fund, has recently been significantly increased to implement measures relating to the NSW Government response to the recommendations of the Victorian Bushfire Royal Commissions. Due to the RFS budget being approved late and with an 18.7% increase in the RFS Fire Fighting Fund, councils' invoices of the emergency service levy are significantly higher in the third and fourth quarter of the 10/11 year. Council's total ESL contributions in 09/10 were \$95,437,176 and in 10/11 have increased by 11.6% to \$106,516,622, where increases in council's rates are pegged at 2.6%. The Associations have also been advised that there are false rumours circulating that the Associations were consulted about and/or approved the increases. For the record the Associations have not agreed to nor approved the RFS budget and not consulted about new programs and associated cost relating to the NSW Government response to the recommendations of the Victorian Bushfire Royal Commissions. The Associations will continue to make representations opposing the ongoing practice of Emergency Service agencies of increasing their budgets drastically and unexpectedly, as well as announcing ESL estimates far too late in the financial year. The Associations continue to maintain their position that the Emergency Service's funding needs to be replaced with a transparent and equitable system, i.e. a broad based property levy.

13.2 FLOOD DAMAGE**F5****Background:**

During the latter part of December 2010 Council was declared a 'Natural Disaster Area' following extensive flooding of the Shire. As a result of the flooding damage occurred on the road network, the Warrena Weir and the Coonamble Common. Submissions have been made to the Roads & Traffic Authority and the Land & Property Management Authority for funds to repair the damage.

Issues:

To enable Council to recoup the cost of repairs to damaged infrastructure it is necessary to submit detailed estimates to various Government Departments. These departments include the Roads & Traffic Authority and the Land & Property Management Authority who then assess the claims to ascertain their validity. Damage other than that caused by flood waters and attributed to vehicles does not qualify. Improvement type works do not qualify and all works are limited to restoration to pre-flood standard. Details of the grants sought are as follows:

a) LOCAL ROADS

Presently Council staff is involved in the repair of flood damage that resulted from the December 2010 floods. During the past two months Council plant and contractors have been active in trying to repair roads and make them useable for the haulage of grain to the local silos, as well as providing access to essential services.

Inspections of the flood damage roads has been 80% completed by the RTA in consultation with Council's staff. Indicative funding for the repair works is estimated at around \$1.5M which will consist of the unspent portion of the 2009 flood repairs not completed and additional damage resulting from the 2010 flood.

b) WARRENA WEIR

Following an on-site meeting with representatives of the Castlereagh Catchment Management Authority (CMA), a plan and submission to utilize CMA and Council funds to repair the Warrena Weir have been lodged. A submission has also been lodged with the Land & Property Management Authority to obtain additional funding to offset the cost of repairs to the eroded bank can channel.

Council is presently hauling clay fill to the area which will be used to backfill the eroded overflow channel and rockfill will be placed to form an overflow spillway, as well as additional scour protection in the overflow channel.

c) COONAMBLE COMMON

As a result of the 2010 flood repairs to fencing and infrastructure associated with the yards will have to be completed. The estimated cost is \$15,500 and an application has been forwarded to the Property Management for the cost of repairs.

Sustainability/Legislative Provisions:

The cost of repairs to roads and infrastructure following flooding is able to be recouped from State and Federal Governments if the Local Government Area is declared a “National Disaster Area”. The declaration was made by the relevant Minister and Council, therefore, qualifies to receive funding of an amount assessed by the Department responsible.

Financial Considerations:

The cost of repairing flood damage is often beyond the Local Government Authority’s budgeted allowance and is needed to carry out improvement works.

Council should adjust its 2010/2011 Management Plan to reflect the grants received for the December 2010 floods.

Options:

Nil

Recommendation:

That Council amend it’s 2010/2011 Management Plan to include the grants received for the December 2010 floods.

13.3 LEVEE INVESTIGATION

Background:

Council has engaged the NSW Department of Public Works to complete a Concept Design for upgrading the Coonamble levee to provide adequate protection to the eastern side of the urban area. The PWD was requested to consider two design options for several flood reoccurrence intervals. These were for a 100 year ARI in both the Castlereagh River and Warrena Creek and a 100 year ARI event for the Castlereagh River and a 50 year ARI in Warrena Creek.

Issues:

The study has resolved that there is little difference between the two flood events (0.07m) and the Concept Design has been based on the 100 year ARI in both the Castlereagh River and Warrena Creek.

An analysis of the freeboard required to prevent the overtopping of the levee when considering external influences that may occur when the design flood occurs has been completed. This provides a 1.0m increase in height above the 100 year ARI event in areas of extreme exposure and 0.8m in areas of low exposure.

A geotechnical analysis has revealed that a 2.0m deep cut-off wall foundation is required between chainages 373 and 950 to reduce seepage – (Namoi Street to between Gordon Street and Macquarie Street). The design proposal incorporates 4:1 Batters on the water side of the levee and lime stabilization of an outer armour protection of the levee. The Concept Design has noted a lack of information in some areas of the original survey and it is suggested that further information be obtained to allow detailed design to commence. Detailed survey is also recommended near structures and at roadways.

Council has forwarded copies of the report to NSW Department of Environment, Climate Change and Water for comment, but no response has been received at the time of writing this report.

Sustainability/Legislative Provisions:

To enable Council to proceed with the upgrade of the levee, it is necessary that the requirements of the NSW Department of Environment, Climate Change and Water be met. This will enable Council to obtain maximum funding from Government sources to not only complete the construction, but to ensure that all studies are completed to community expectations.

Financial Considerations:

It is important that Council access all sources of grant funding to minimize the impact that the construction of the levee will have on local residents. Once Council has an idea of the likely cost of the levee it should ensure that adequate

reserves are available to proceed with the levee's construction. Based on an estimate of \$5M - \$6M Council should have a reserve of \$1M.

Options:

1. Do nothing.
2. Staff continue to work with the NSW Department of Environment, Climate Change and Water to complete the Investigation & Design Phase.

Recommendation:

That Council liaise with the NSW Department of Environment, Climate Change and Water to complete the Investigation into the Design of the Coonamble Levee.

14. MANAGEMENT PLAN REVIEW AND QUARTERLY BUDGET
REVIEW TO 31 DECEMBER 2010
FOR COUNCIL MEETING WEDNESDAY 9th FEBRUARY 2011

Background:

In accordance with Section 407 of the Local Government Act 1993 and Section 203 of the Local Government (General) Regulation 2005 the General Manager must report to Council within two months of the end of each quarter the extent to which the performance targets of Council, set by the Management Plan, have been achieved and submit a review of the estimates of income and expenditure for Council's consideration – (attached A3 sheets).

Issues:

(i) MANAGEMENT PLAN:

A copy of the Management Plan is attached showing performance against the targets set by Council for the current year.

(ii) BUDGET REVIEW:

Council adopted the budget for the current year at its meeting of 10 June 2010. Given the advertising requirements of 28 days and the time taken to prepare the budget results in lengthy lead times. Consequently the budget is prepared without actual knowledge of the year end result which has an effect on the current budget and which has been adjusted to reflect such contingency.

The following is a list of major budget variations for Council's consideration:

1. Insurance Rebate (P2) – reduction of \$10,000 in anticipated income for return to Council from insurer.

Interest income increased \$49,625 due to interest rates increasing and Council having greater than anticipated investment amounts.

2. Engineering Salaries (P3) – reduction of \$21,000 off set by increase in overseer salary of \$20,000.

3. Diesel Fuel Rebate (P4) – additional \$40,000 income anticipated, offset by reduction in the additional transfer to plant reserve of \$20,000.

4. RFS Reimbursable Items (P5) - additional income and expenditure of \$241,800, and additional income of \$15,000 for Hazard Reduction.

5. Dwellings General M&R (P8) – additional expenditure of \$10,000 additional work required on Nash St and Townsend St.

Development Applications – additional \$5,000 income anticipated.

6. Coonamble Water Supply (P11) – additional income of \$30,000 anticipated from interest income.

7. Rodeo Arena/Sportsground (P16) – additional expenditure anticipated \$10,000.

8. Transport and Communication (P18) - Flood Damage Local Roads, anticipated expenditure of \$29,000, this is council's responsibility under the funding arrangements.

State Highways (P19) – Six additional works orders received, income and expenditure of \$395,889 including emergency flood damage work to State Highway.

Regional Roads (P19) - additional income and expenditure \$15,635 reflecting emergency flood damage work.

9. Tourism (P20) – marketing expense additional \$6,000, reflects the purchase of brochures for Coonamble and Gulargambone.

10. Farming (P21) – Transfer to farming reserve abandoned \$120,000, income from farming reduced by \$80,000 and transfer from farming reserve \$120,000 abandoned.

11. Capital Items (P22) – Sale of Furniture Gulargambone House income \$9,500, transferred to Premises Reserve \$9,500. Work undertaken on calf yards \$8310, and purchase of portable toilet block, \$15,654 funded by transfer from Showground Reserve.

Industrial Estate Stage 1 (P23) – anticipated expenditure of \$344,405 funded by grant funds of \$125,000 and transfer from reserve of \$219,405.

Meglo Sale to Graincorp – income of \$144,840 from sale transferred to Development Reserve.

Coonamble Water Supply – Fluoridation expenditure of \$187,301 incurred, income funded from anticipated grant funds \$187,301.

As Council's responsible accounting officer it is my opinion, having regard to the original estimate of income and expenditure and the quarterly review of these estimates at 31 December 2010, that Council is in a satisfactory financial position.

16.1 REPORT ON COONAMBLE ECO SPA FEASIBILITY ASSESSMENT & BUSINESS CASE (Appx. H)**1. Background:**

For many years, Coonamble Shire residents have been calling for the re-establishment of a public bore baths complex. It remains a high priority in community consultation and planning and is seen as a step towards achieving some diversification of the local economy. In 2006/07 a local businessman approached Council's EDM seeking information on establishing a bore baths at a privately held site. In 2010, another local interest contacted the EDM to discuss whether their site would be suitable. Initial investigations revealed the complexity of establishing a bore bath facility that would satisfy increasingly stringent environmental and regulatory requirements. It was felt that expert opinion was needed so as to determine whether either a private or publicly-owned bore bath facility would be feasible in Coonamble. In mid 2010, Council commissioned a team co-ordinated by Jenny Rand & Associates to undertake a preliminary assessment of the feasibility of establishing an Eco Spa in Coonamble and to prepare a Business Case Study. The primary objective was to determine if the Eco Spa concept is potentially feasible and warrants further details investigation and analysis. **PLEASE REFER TO THE EXECUTIVE SUMMARY OF THE FINAL REPORT.**

2. Issues:**2.1 Technical, engineering & legal requirements**

There are a number of issues which will need further investigation or specific action to be addressed including water management [eg. Whether town bores can deliver additional water; retaining heat to the desired temperatures; whether an EPA licence is required to dispose of the volume of water required]. At this point, none of these issues seem to be insurmountable.

3. Sustainability/Legislative Provisions:

3.1 An Eco spa would need to be carefully planned and include 'best practice' principles of energy and water use to be sustainable.

3.2 Site Development & Ownership

The report outlines a number of potential opportunities for Council if the Caravan Park/Smith Park is accepted as the preferred site. These include:

- Offering the site as an investment opportunity for a private sector operator to build and operate the Spa and Caravan Park.
- A joint venture arrangement with a private operator, with Council providing some of the infrastructure in return for a share of the profit.
- Council to develop, own and operate the complex, paying a manager and retaining all profit.
- Council to develop and own the complex and lease it out at a commercial rate.

3.3 Markets and Competition

- Spa tourism is a growth market nationally and internationally. In Australia it is one of the fastest growing segments of the domestic market with growth expected to accelerate.
- Artesian Spas in NSW are concentrated in the north west region. Those currently open to the public are located in towns both larger and smaller than Coonamble, towns more and less remote, more and less picturesque, more and less disrupted by social problems. The majority of owners are continuing to invest heavily and develop their spa facilities. Each town has a different style and standard of pool, different pool temperatures and water disposal methods, and each has approached ownership and management in various ways. It is a diverse market with room for new product to easily find a unique position somewhere between the theme-park style and the basic bush style of hot artesian spa.

3.5 Establishment & Operating Costs

- The project would need to be staged with each component carefully considered. The eventual viability of the project hinges on ensuring highest possible standard of facilities and surrounds, as this has been identified as the key opportunity.

4. Financial Considerations:

The report recommends that Council proceed to the detailed assessment stage. This would involve:

- Engineering assessment and advice
- Preparation of architectural plans for both the Spa and Caravan Park.
- Detailed costing by a Quantity Surveyor
- Financial analysis – operating forecast, cash flow analysis and investment analysis.

The financial cost would be dependent upon how Council chooses to structure the development if a decision is made to take the next step. Please refer to the Executive Summary and the section entitled “Opportunity”.

5. Options:

5.1 Accept the report and do nothing.

5.2 Accept the report and obtain cost estimates on the next phase.

**Recommendations:
For Council’s determination.**

19.1 REPORT BY CONTRACT RANGER – December 2010

Dear Sir

I submit my report for the month of December 2010.

Threats of Physical Assault

Council's Ranger was again threatened with physical assault by two members of the same family this month. The matter was in relation to the same dog wandering that was cautioned last month, however on this occasion the Ranger seized and impounded two dogs wandering unattended in the street. The matter was again reported to police and further action is being taken against the dog owners.

19.2 REPORT BY CONTRACT RANGER – January 2011

Dear Sir

I submit my report for the month of January 2011.

Apprehended Violence Orders (AVO)

Coonamble Police have issued two AVO’s against the persons who threatened Council’s Ranger with physical assault last month. One AVO was ratified by Coonamble Local Court this month with the other AVO still pending and awaiting service.

Court Election

A dog owner has elected to have a penalty infringement notice issued in August 2010 heard in Local Court. The infringement notice was in relation to a declared Restricted dog (Pitbull Terrier cross). Council’s Ranger prepared a brief of evidence. The matter was adjourned until February 2011.
